

MACH 1 HVLP

The MACH 1 is a full size HVLP spray gun with special nozzles and modifications that allow it to operate at high transfer efficiencies in compliance with the California South Coast Air Quality Management District (SCAQMD) regulations as a high volume low pressure (HVLP) air spray gun.

Constructed of a lightweight drop-forged aluminum body and stainless steel fluid passages, including long life self-adjusting packings, this spray gun is designed to stand up under hard, continuous use. It operates like a conventional spray system utilizing compressed shop air.

Technical Specifications

Body: Drop-forged aluminum
 Weight: 20.1 Oz.
 Air Inlet: 1/4" NPS (m)
 Fluid Inlet: 3/8" NPS (m)
 Fluid Passages: Stainless Steel
 Feed Type: Pressure / Siphon Feed
 Part Sheet: 77-2463
 Gun Repair Kit: 54-3605

Most Popular Nozzle Set Ups:

MACH 1 94 - 94P
 MACH 1 94 - 93P
 MACH 1 92 - 94P
 MACH 1 91 - 94P
 Standard Fluid Nozzle and Needle are 303 Stainless Steel

See page 15 for additional standard and specialty fluid nozzle recommendations.
