### MODEL 570 AUTOMATIC MASTIC AIRLESS SPRAY GUN 6700-0000-7 FOR PROFESSIONAL USE ONLY

### WARNING — HIGH PRESSURE — WARNING

MAXIMUM WORKING PRESSURE UP TO 4000 POUNDS PER SQUARE INCH

# DO NOT POINT SPRAY GUN AT ANY PART OF THE HUMAN BODY FLUID UNDER HIGH PRESSURE CAN PENETRATE THE SKIN AND CAUSE SEVERE INTERNAL INJURY IN CASE OF INJURY OBTAIN MEDICAL ATTENTION IMMEDIATELY BE SURE TO REPORT NATURE OF INJURY AND TYPE OF FLUID OR SOLVENT TO THE DOCTOR

INSTALLATION AND OPERATING INSTRUCTIONS

Be sure you understand ALL of the following instructions thoroughly BEFORE operating any part of the airless equipment system. CONSULT YOUR BINKS REPRESENTATIVE TO CLEAR UP ANY ITEMS OF INSTRUCTION YOU DO NOT UNDERSTAND.

- 1. UNDER NO circumstances should the spray gun be carelessly handled nor its spray (even when the nozzle is removed) directed at close proximity to any part of the human body.
- 2. DO NOT operate airless spray gun with tip guard housing removed or altered.
- 3. NEVER clean, change, or remove the nozzle from the spray gun without first doing the following:
  - a. Shut off pump and, in addition, unplug electrical cord or turn off air supply.
  - b. Release fluid pressure in the entire system, from pump or supply line to spray gun.
- 4. NEVER attempt to force the flow of liquid backward through the gun (blowback) with your finger, hand, or hand-held object pressed against the gun nozzle.
- Your new Binks 570 Automatic Airless Spray Gun has been thoroughly tested before leaving the factory. No adjustments are required before spray operations begin other than installing the nozzle tip selected. The gun body has four holes which allow the material body to be mounted in any of four positions for convenient fluid hose hookup.

The following steps are recommended for obtaining best results from your spray gun:

- Install spray gun on gun mount and tighten the set screw (9) securely. Note: The mounting hole is 1/2" diameter.
- 2. Connect air hose to fitting (16). The gun is actuated by air pressure from a 3-way valve. The valve provides air to trigger, shut-off, and exhausts air from the gun. The gun should be limited to 200 cycles per minute (maximum). Approximately 40 to 60 psi air pressure is required to operate the spray gun; however, use the minimum air pressure required.
- 3. Connect high pressure airless fluid hose to the gun material body assembly (7) and tighten.
- 4. Remove tip guard assembly (4), nozzle tip, and gasket(3) from spray gun (or remove Twist-Tip if used).

- 5. NEVER plug a hose leak with your finger, with adhesive tape, or other "stop-gap" device.
- 6. NEVER operate the airless system with a defective hose. ALWAYS replace the defective hose immediately. For continuing safety, users are urged to:
  - a. ALWAYS handle carefully all hose connections, joints, and seating surfaces on the spray gun to prevent damage.
  - b. NEVER kink or bend the fluid hose into less than a four inch radius.
  - c. FREQUENTLY check the hose for kinks or abrasions. These may develop into a rupture.
  - d. NEVER use standard hardware to modify the airless system. ALWAYS use Binks high pressure fittings only.
- 7. The airless pump must be grounded before operating the airless spray system.

#### Turn on air supply to operate air value to spray gun. Turn on material supply very slowly and allow spray gun to trigger a few times to purge any entrapped air

5. Shut fluid supply and air supply OFF.

in fluid system.

- 6. Replace gasket (3), nozzle tip, and tip guard assembly (4) (or Twist-Tip) as per safety procedure described in paragraph 3 above.
- 7. Turn air and fluid supply ON and check the spray pattern for proper atomization.
- 8. The spray gun nozzle should be located at such a dis-

#### NOTE

When the pattern is right, the pressure is right. Excessive fluid pressure will only distort the spray pattern.

tance to the product where maximum fan pattern width is evident. This is usually 8" to 14". The spray pattern may be positioned either vertically or horizontally by rotating nozzle tip (or the Twist-Tip).

continued on pg. 3

EN

#### In this part sheet, the words **WARNING**, **CAUTION** and **NOTE** are used to emphasize important safety information as follows:

## WARNING

Hazards or unsafe practices which could result in severe personal injury, death or substantial property damage.

## 

Hazards or unsafe practices which could result in minor personal injury, product or property damage.

## NOTE

Important installation, operation or maintenance information.

### 🛕 WARNING

### Read the following warnings before using this equipment.

#### **READ THE MANUAL**

Before operating finishing equipment, read and understand all safety, operation and maintenance information provided in the operation manual.

#### **OPERATOR TRAINING**

All personnel must be trained before operating finishing equipment.

#### EQUIPMENT MISUSE HAZARD Equipment misuse can cause the equipment to rupture,

malfunction, or start unexpectedly and result in serious injury.

#### LOCK OUT / TAG-OUT

AUTOMATIC EQUIPMENT

Failure to de-energize, disconnect, lock out and tag-out all power sources before performing equipment maintenance could cause serious injury or death.

#### PRESSURE RELIEF PROCEDURE

Always follow the pressure relief procedure in the equipment instruction manual.

Automatic equipment may start suddenly without warning.

#### **KEEP EQUIPMENT GUARDS IN PLACE** Do not operate the equipment if the safety devices have been removed.

KNOW WHERE AND HOW TO SHUT OFF THE EQUIPMENT IN CASE OF AN EMERGENCY

WEAR SAFETY GLASSES Failure to wear safety glasses with side shields could result in serious eye injury or blindness.

DiD

#### INSPECT THE EQUIPMENT DAILY

Inspect the equipment for worn or broken parts on a daily basis. Do not operate the equipment if you are uncertain about its condition.

#### NEVER MODIFY THE EQUIPMENT

Do not modify the equipment unless the manufacturer provides written approval.

#### NOISE HAZARD

You may be injured by loud noise. Hearing protection may be required when using this equipment.

**PROJECTILE HAZARD** You may be injured by venting liquids or gases that are released under pressure, or flying debris.

**PINCH POINT HAZARD** Moving parts can crush and cut. Pinch points are basically any areas where there are moving parts.

#### STATIC CHARGE

Fluid may develop a static charge that must be dissipated through proper grounding of the equipment, objects to be sprayed and all other electrically conductive objects in the dispensing area. Improper grounding or sparks can cause a hazardous condition and result in fire, explosion or electric shock and other serious injury.

#### WEAR RESPIRATOR

Toxic fumes can cause serious injury or death if inhaled. Wear a respirator as recommended by the fluid and solvent manufacturer's Safety Data Sheet.

#### **TOXIC FLUID & FUMES**

Hazardous fluid or toxic fumes can cause serious injury or death if splashed in the eyes or on the skin, inhaled, injected or swallowed. LEARN and KNOW the specific hazards or the fluids vou are using.

#### FIRE AND EXPLOSION HAZARD

Improper equipment grounding, poor ventilation, open flame or sparks can cause a hazardous condition and result in fire or explosion and serious injury.

#### MEDICAL ALERT

Any injury caused by high pressure liquid can be serious. If you are injured or even suspect an injury:

- · Go to an emergency room immediately.
- Tell the doctor you suspect an injection injury.
- . Show the doctor this medical information or the medical alert card provided with your airless spray equipment.
- Tell the doctor what kind of fluid you were spraying or dispensing.

#### GET IMMEDIATE MEDICAL ATTENTION

- To prevent contact with the fluid, please note the following:
- Never point the gun/valve at anyone or any part of the body.
- Never put hand or fingers over the spray tip.
- Never attempt to stop or deflect fluid leaks with your hand, body, glove or rag.
- Always have the tip guard on the spray gun before spraying.
- Always ensure that the gun trigger safety operates before spraying.

#### **PROP 65 WARNING**

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

IT IS THE RESPONSIBILITY OF THE EMPLOYER TO PROVIDE THIS INFORMATION TO THE OPERATOR OF THE EQUIPMENT. FOR FURTHER SAFETY INFORMATION REGARDING THIS EQUIPMENT, SEE THE GENERAL EQUIPMENT SAFETY BOOKLET (77-5300).

Binks reserves the right to modify equipment specification without prior notice.

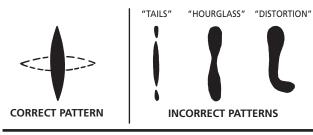

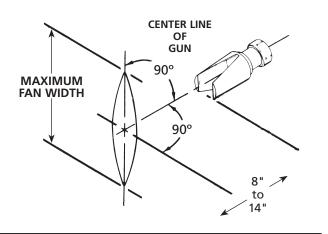

#### **Binks MODEL 570 AUTOMATIC MASTIC AIRLESS SPRAY GUN**

- 9. "Hour glass" or "tails" on the spray pattern normally indicates too low a fluid pressure for the nozzle tip being used; or, the material is too viscous.
- 10. A distorted spray pattern usually means a plugged or worn nozzle tip.
- 11. Using excesive fluid pressure will only cause undue wear of the nozzle tip.

#### MAINTENANCE INSTRUCTIONS (See High Pressure Warning Statement on Page 1)

#### To Clean Nozzle Tip:

- 1. BEFORE proceeding with any maintenance, read safety procedure, paragraph 3, in High Pressure Warning, page 1.
- 2. Remove tip guard assembly (4), nozzle tip, and gasket (3).
- 3. Submerge nozzle tip in solvent to remove dried material.
- 4. Blow air through nozzle tip to clean.
- 5. Airless spray nozzle Tips are made of tungsten carbide and are very brittle. Do not drop. To clean a nozzle tip use solvent, toothpick or sharpened match. Never use a metal probe.

#### To Replace Wire Assembly:

- 1. BEFORE proceeding with any maintenance, read safety procedure, paragraph 3, in High Pressure Warning, page 1.
- 2. For convenience, you may wish to remove spray gun from gun mount.

#### DIFFUSER ASSEMBLIES\*

Reduces fluid velocity to minimize tip wear and to aid fluid filtration. 54-2229 nylon gasket is included with 54-2378.

54-2378 nut for use with 54-1835 (.005) or 54-1836 (.009) edge type filter.

- 3. Carefully remove the cap (10). The spring (13) is under tension and will come out when cap (10) is removed.
- 4. Remove nut (14) and lockwasher (15). The back plate (12), diaphragm (11) and washer (17) may be removed at this time.
- 5. Loosen the wire assembly nut (6) from the stem (20).
- 6. Loosen and remove the bearing screw assembly (19) and the stem (20) from spray gun. The packing (18) should also be inspected at this time. If worn, replace.
- 7. Loosen and remove the gland nut (21). The wire assembly (6) may now be pulled rearward from the spray gun.
- 8. If worn, replace the gland set (22).
- 9. The material body assembly (7) may be removed for cleaning by loosening set screws (1). Note the pin in gun body assembly (8).
- 10. Reassemble in reverse order.

BINKS.

#### **BINKS TWIST-TIP REVERSIBLE NOZZLE CLEANER**

#### GENERAL

The Twist-Tip nozzle cleaner allows purging of a clogged nozzle orifice without disassembly from the spray gun. The tungsten carbide nozzle is permanently assembled into the rotatable cylinder tip insert and handle assembly. No alignment or adjustments are required.

#### ASSEMBLY

Assembly to spray gun is simple and the exploded view is self-explanatory. The 54-2378 diffuser assembly is required to assemble the Twist-Tip into the gun.

#### FEATURES OF THE TWIST-TIP ATTACHMENT

- Fits most popular airless spray guns
- Low friction turning
- Equals or exceeds life of other reversible spray tips
- Hand-tightened seal system
- Assembly suitable for solvent and water-based
- Maximum working pressure: 7,500 PSI
- Rapid changing of the tip and base by hand without tools

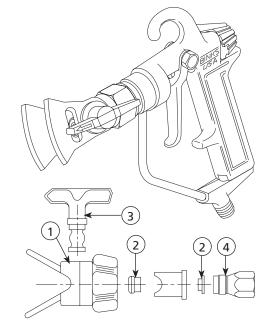

#### IMPORTANT OPERATING INSTRUCTIONS

- 1. The spray gun must be shut off while rotating the Twist-Tip attachment handle.
- 2. If leakage occurs, unit must be disassembled, cleaned and parts checked for any damage. Replace damaged parts with genuine Binks parts.

#### 🛦 WARNING

Do not operate unit with leakage from the spray gun, Twist-Tip attachment or hose or severe injury may result.

 With proper care, the Twist-Tip attachment will give long, reliable service. To maintain this performance, it should be flushed with solvent or proper cleaning fluid following each spray period.
