

JGA-156-K10 Spring Clip Installation Instructions

The JGA-156 spring clip is used to retain any single piece, Devilbiss air cap with either MBC-368 or MSA-1 retaining ring (new style). This reduces the chance of parts loss and makes air cap installation easier.

The retaining ring (MBC-368 or MSA-1) must include a groove as shown below in order to use the JGA-156 spring clip. Inspect the retaining ring to determine if it has a groove and assemble the cap, ring and clip as shown in the illustration on Page 2.

**(Old Style)
MBC-368 or MSA-1**

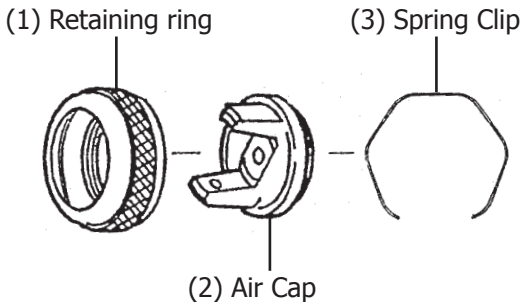

**(New Style)
MBC-368 or MSA-1**

SERVICE INSTRUCTION

The illustration below shows the proper installation using the JGA-156 spring clip:
