

KK-4978 ADAPTER/ QUICK CONNECT KIT

DESCRIPTION

The Adapter/Quick Connect Kit will allow a painter to adapt any DeVilbiss spray gun with removable plug in bottom of gun handle for use with an existing cup pressure control assembly.

INSTALLATION

1. Remove plug in the bottom of gun handle using the 6 mm hex key wrench provided in this kit.
2. Clean remaining thread sealing compound from the threads in gun using a stiff bristle brush.
3. Apply a thread sealing/locking compound (not included) to the JGHV-108 adapter threads. Using the 6 mm hex key wrench, install the adapter into the gun and tighten until it bottoms out.
4. Apply a thread sealing/locking compound to the SSP-55 coupling body threads and assemble to the adapter. Locate the release button toward the back side as shown in the illustration below. This will prevent an accidental release.
5. **For Model JGHV-520 Only** – Remove the adapter stud from the gun's head. Apply a thread sealing/locking compound to the 20-6161 set screw and tighten securely into gun. This will plug the existing air tube hole that will no longer be needed.

Your existing cup pressure control assembly can now be attached to your gun.

Note

The quick connect does not have an automatic air shut-off. Always shut off the air supply to the gun before pushing the quick connect's release button.

PROP 65 WARNING

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

20-6161 Set Screw
(for Model JGHV-520 only)
