

RansFlex Auto Applicators

80665/82665 RFXA
80765/82765 RFXAW

From shared customer feedback we have further improved the RansFlex Auto Applicators regarding the following issues:

- Pilot operating pressures to trigger the applicators for fluid. Prior pressure activation was 80-90 PSIG (5.52-6.20 Bar). We have redesigned the feature to operate at 50-60 PSIG (3.44-4.14 Bar). We understand that not all customers have suitable pressures from compressed air and need lower activation pressures.
- Non-Bleed gun option addressing PSIG air leakage when actuated. It was noted that the non-bleed gun was losing excessive air when actuated to trigger the gun. We have addressed the design to add in sealing O-ring 13076-12 to eliminate any PSIG air leakage when the gun is triggered.

Shown below is Retrofit Kit Part No. 80892-00 which includes new piston and cage along with all required O-rings and seals. This kit will replace your current piston and cage within your RansFlex Auto gun provided the gun assembly is a “Non-Bleed” gun version. Please reference the AA-17-01(80665/82665 RFXA) and AA-18-02 (80765/82765 RFXAW) service manuals on removal and installation of the piston and cage components. Any questions please reach out to the Carlisle Fluid Technologies customer service team for further assistance.

80892-00 PISTON KIT			
Item No.	Part No.	Description	Qty.
1	80594-00	PISTON ASSEMBLY	1
2	80603-00	BUSHING ASSEMBLY	1
3	13076-12	O-RING 2-012 PTFE	1

WARRANTY POLICY

This product is covered by Carlisle Fluid Technologies' materials and workmanship limited warranty. The use of any parts or accessories, from a source other than Carlisle Fluid Technologies, will void all warranties. Failure to reasonably follow any maintenance guidance provided, may invalidate any warranty.

For specific warranty information please contact Carlisle Fluid Technologies.

For technical assistance or to locate an authorized distributor, contact one of our international sales and customer support locations.
