RANSFLOW START-UP REQUIREMENTS

Inspector's
Initials

For Ransburg Technical Service Call: (800) 233-3366

Before Start-Up (Site Inspection)

- Control panel installed in a convenient area, located in a suitable environment (see manual for more details).
- Make sure that the customer's main disconnect that supplies power to the RansFlow is off.
- Verify the incoming power to the disconnect.
- Ensure pneumatic control lines connected properly.
- Ensure flow meter cables are connected up properly.
- Verify all I/O wiring (if present).
- All dip switch settings verified and documented.
- Grounding checked to a known earth ground.

for service manual information

Start-Up Requirements

- Turn on the customer's main disconnect that supplies power to the RansFlow.
- Verify correct incoming voltage at RansFlow.
- Turn on the main power switch on the RansFlow.
- Configure software parameters per application.
- Make sure Estop push button on front of cabinet is pulled out. (This enables all I/O devices.)
- Test output of pneumatic signals through force I/O screen.
- Load system with solvent or water and check for fluid leaks.
- Test for proper operation with solvent or water before loading paint.

NOTE: Additional information regarding equipment and/or its capability can be found in the corresponding service manual
For "Spare Part Information" reference the equipment service manual
Always use genuine Ransburg replacement parts to assure maximum uptime with applicator.
